# About us

We also appoint qualified and experienced people in our company to give the maximum benefits of their knowledge and skill to our end user customers through the quality of our products and a fair price for those products. Our commitment to quality is reflected in our use of modern technology and our experienced team, ensuring that our customers receive the best possible products at a fair price. We are dedicated to providing a complete solution for all basic and fashion clothing needs, with a wide range of options for men, women, and children.

We continuously strive to improve our product offerings and stay up-to-date with the latest trends in the fashion industry, ensuring that our customers always have access to the most stylish and high-quality clothing. Our focus on innovation and customer satisfaction has allowed us to become a trusted name in the fashion industry with a loyal customer base that continues to grow year after year.

# Products

# Infrastructure

## Knitting

We utilize the latest and most advanced technology machineries to knit the fabrics like Pailung, Mayer & Cie to produce various qualities of circular knitted fabrics, right from 100gsm to 400gsm.

## Cutting

Cutting is the first step in garment assembly. Creating a garment without cutting is impossible. The process of cutting involves laying out the fabric, marking it, and then cutting it in accordance with the pattern. This step establishes the precision and calibre of the final product. In our company, only individuals with extensive training perform cutting. They employ sophisticated cutting tools and methods to ensure precision and accuracy with every cut. Our team of cutters is responsible for cutting the fabric according to the pattern, minimizing waste, and optimising efficiency.

## Softflow Dyeing

Fabrics are typically dyed with ultramodern soft flow equipment these days. According to the criteria of Oeko Tex, the dyes and chemicals that were employed included no azo compounds. Production using these methods ensures that the fabrics are not only vibrant and long-lasting but also environmentally friendly and safe for consumers to use. HTHP machines are used for cotton, polyester, viscose, and other blend fabrics.

## Stitching

Garment sewing units are done with proper lighting, good floor space, and amenities. Legal and statutory norms with respect to social systems and physical facilities are provided. As a safety standard, we are following the necessary COVID-19 precautions. These measures ensure a safe and comfortable working environment for the employees while maintaining the quality of the garments produced. Additionally, regular monitoring and inspections are conducted to ensure compliance with safety regulations.

## Compacting

Proactive approach to quality assurance begins with inspection of raw materials. We are committed to deliver high standard quality products by conducting 100% inspection of fabrics inhouse for production.

## Checking

Checking is the process of cutting off any extra threads and looking over the finished product for any flaws or mistakes before it is packaged and sent to the customer. This step ensures that the product meets the manufacturer's quality standards and specifications. Before packing, all garments are thoroughly inspected. Competent people check the pieces properly in the checking section.

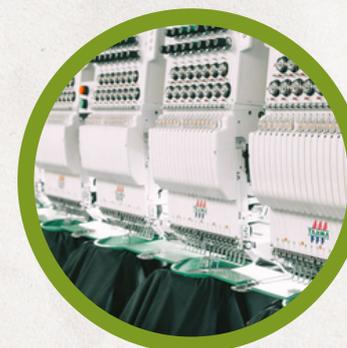

## Printing

All over print using rotary printing machine Stormac for reactive, pigment, discharge & Placement prints. pigment, plastic sol, non pvc, flock, glitter, discharge prints on machines like Hebbecker & MHM.

## Ironing

Ironing lines work together to ensure that all products are ironed evenly. This line also serves as a final quality checkpoint prior to product packaging.

## Embroidery

Computerised multi head embroidery machines to make chain, loop stitch and chenneli designs up to 8-9 colors on Japanese make Barudan machine. Hand embroidery designs with sequence work, beads...Stone fixing, rhime stones, heat transfer photo & flock prints.

## Packing

We buy our packing materials from leading suppliers and professional providers. We use Oeko Tex certified labels and tags produced by a sustainable company to ensure that our products are environmentally friendly and safe for our customers to use. Additionally, we prioritize using biodegradable and recyclable materials in our packaging to reduce our environmental impact and promote sustainability. Our commitment to eco friendly practices extends throughout our entire supply chain.

# Quality Standards

Quality is our priority. We work as per the requirements and specifications of our clients to ensure that we deliver products and services that meet or exceed their expectations. Our team is committed to continuous improvement and strives to maintain the highest standards of quality in all aspects of our work for our valuable clients. Our group of experienced professionals conducts rigorous quality checks at every stage of production, and after the final product is made, the entire consignment is checked and timely dispatched.
